

Ben M. Andrew

benjamin.andrew@manchester.ac.uk | benmandrew.com

Education

University of Manchester, PhD in Computer Science Sep 2024 – Present

- Project titled *Developing Reliable Software for Autonomous Robots*.
- Supervised by Dr. Marie Farrell, Dr. Louise Dennis, and Prof. Michael Fisher.

University of Cambridge, BA (Hons) in Computer Science Oct 2019 – Jun 2022

- Grade II.1 (70%).
- Dissertation titled *Delay-Tolerant Link-State Routing*. Implemented and empirically evaluated a failure-tolerant routing protocol in C to run on real Unix-based routers, comparing with traditional protocols. Supervised by Dr. Jackson Woodruff.

Research Interests

My interests lie in the intersection of autonomous robotics and formal methods. Specifically, I am passionate about verifying mission-critical systems under uncertainty and failure.

Publications

- Ben M. Andrew. *Weakening Goals in Logical Specifications*. Rigorous State-Based Methods (ABZ) 2025. DOI: 10.1007/978-3-031-94533-5_22

Professional Activities

- Part of the local organising committee of Integrated Formal Methods (iFM) 2024.
- Member of the Autonomy and Verification Network.

Teaching Experience

University of Cambridge, Supervisor (TA equiv.)

- Part II CST: *Hoare Logic and Model Checking* 2024 – 2022
- Part IB CST: *Logic and Proof* 2025 – 2022
- Part IB CST: *Semantics of Programming Languages* 2023
- Part IA CST: *Introduction to Graphics* 2025, 2022

University of Manchester, Graduate Teaching Assistant

- COMP23412: *Software Engineering* 2025
- COMP60332: *Automated Reasoning and Verification* 2024
- COMP21111: *Logic and Modelling* 2024
- COMP11120: *Mathematical Techniques for Computer Science* 2024

Industry Experience

Software Engineer, Tarides – Paris, France Sep 2022 – Jun 2024

- Developed open-source continuous integration (CI) software for the OCaml language's ecosystem, involving systems programming to distribute dependency solving, compilation, and testing to many operating systems and architectures.
- Responsible for the CI of the Opam Repository, the central package universe for OCaml with tens of thousands of packages.

Embedded Systems Intern, Tarides – Paris, France Jul – Sep 2021

- Research & development project to cross-compile the OCaml bytecode runtime to an ARM-based microcontroller using a real-time operating system as a base layer.

Computer Graphics Research Intern, University of Cambridge

Jun – Sep 2020

- Developed and implemented a visual model of ageing vision in virtual reality with Unity, as part of the Graphics and Displays Research Group.

Volunteering

Run Leader, Runwild – University of Manchester

Dec 2024 – Present

- Lead bi-weekly group runs for a student running group.

English Teacher, Connections English Institute – Ibagué, Colombia

Jul – Aug 2024

- Taught adult beginners in morning and night classes.
